

# Welcome to Programming with Processing!

## Bancroft School – Summer 2016

Instructor's name: Elisa Heinricher

Instructor's e-mail: [ehenricher@bancroftschool.org](mailto:ehenricher@bancroftschool.org)

Course meeting times: M – F, July 18 – July 29, 9 AM to 11 AM

Course materials website: <https://github.com/Mrs-H/Processing-3-2016>

This course is about graphics programming using the Processing programming language. We will concentrate on creating images, animations and interactive applications. Our emphasis in this class is on having fun with programming, while picking up some good programming habits along the way.

The Processing language is a derivative of the Java programming language. It was created in 2001 by Casey Reas and Ben Fry who wanted a programming language that would make programming interactive graphics easier than any other language that existed at that time.

You can download Processing for free at this website:

<https://processing.org/download/?processing>

You will also want to bookmark the Processing Reference page:

<https://processing.org/reference/>

Feel free to e-mail me if you have any questions outside of regular class hours.
